Immerse yourself in the
spa culture of Europe

GREAT
SPA TOWNS
of Europe

European Historic Thermal Towns – Places of Wellbeing & Health, Culture & Heritage

For more than 2000 years people have travelled across Europe to the healing hot mineral springs which are at the centre of many spa towns around the continent. Over time these towns developed medical centres, pump rooms, and magnificent temples to the art of bathing, along with hotels and infrastructure to keep guests entertained – theatres, casinos, art galleries and concert halls. Parks and gardens are also a beautiful feature of these towns, often with covered walkways and colonnades that celebrate the astonishing nature of its surroundings, the therapeutic landscapes of Europe.

These towns are famous for their festivals – music literature, film, comedy, food and wine... in many cases some of the earliest ones in Europe.

Whether you are searching for a spa break in a vibrant atmosphere full of culture, heritage and entertainment, or a haven of relaxation in a quieter smaller town set in wonderful landscapes, our spa towns are breathtaking destination to pamper yourself and recharge your batteries.

Enjoy the following selection of tourism packages!

More information: www.historicthermaltowns.eu

The Great Spa Towns of Europe

is a group of eleven exceptional spa towns in seven countries, which together form one incredible World Heritage Site. They were inscribed on the UNESCO World Heritage List in July 2021.

The Great Spa Towns of Europe represent the best of the European Spa Culture phenomenon which was at its height from the middle of the 18th century to the 1930s. Mineral-rich and thermal springs were the catalysts for the development of a very special urban landscape, and over time, sometimes over millennia, the towns became renowned as places of healing, culture, architecture, entertainment and leisure. Their intangible cultural and artistic heritage, and their influence on European culture is as important as their architecture and natural landscape.

With smart hotels, theatres, and opera houses, casinos and conversation houses, these towns were the fore-runners of today's modern tourism industry, and they have continued to be fashionable resorts of health, leisure and culture ever since. Each of the eleven towns in this 'serial transnational' World Heritage Site continues the living tradition of using their waters for health, through drinking and bathing – the perfect places to relax in body mind or spirit.
